

BEN STANLEY

PREVIOUS EXPERIENCE

Career Break | Jan 2025 – Present

- Took time off to travel across Australia and recharge. Now actively seeking new technical challenges with a refreshed perspective and focus.

Software Developer / Engineer (C#) | Inspired Agency, Oct 2023 – Jan 2025

- Development of ecommerce websites, online portals/platforms, and mobile applications for a variety of clients in different domains.
- Primarily using C#, .NET and SQL, whilst also gaining further exposure to React.js, and React Native via web app and mobile app development.
- Delivered scalable web and mobile solutions as part of Agile cross-functional teams, resulting in faster client delivery and improved user experience.
- Worked on .Net and Shopify ecommerce sites, enhancing user experience and functionality, with integration of payment functionality via Stripe/Opayo and PayPal.
- Integrated Slack for real-time error monitoring, improving incident response time.
- Collaborated with the in-house design team to translate Figma designs into responsive, accessible front-end code.

Software Developer | Basemap, Jan 2021 – Oct 2023

- Developed and maintained full-stack applications using .NET, C#, Entity Framework, and SQL.
- Deployed applications to Azure App Services and configured pipelines in Azure DevOps for CI/CD automation.
- Integrated public transport data, performed data transformations, and displayed information on the UI.
- Utilized React.js for front-end development, AWS for email services and storage solutions.
- Followed agile methodologies, applied MVVM and MVC patterns, and adhered to SOLID principles.

EDUCATION

BSc Computer Science, 1st Class | University of Hull, 2016 – 2020

- Key Modules: Database Techniques (83%), Software Engineering (81%), Networking and User Interface Design (93%), Advanced Software Engineering (91%).
- Honours Project: Developed a personal financial modelling package using ASP.Net MVC and Bootstrap, hosted on Azure.

A Levels & GCSEs | Cranbrook Grammar School, 2010 – 2016

- A Levels: Maths, Business Studies, History
- GCSEs: 2 A*s, 4 As, 4 Bs, including A* in ICT

KEY SKILLS

Languages and Frameworks:	C#, .NET 6/7/8, SQL, LINQ, Entity Framework, JavaScript, React.js, HTML, CSS, Bootstrap
Architecture & Patterns:	MVVM, MVC, Clean Architecture, SOLID, Dependency Injection
DevOps & Tools:	Azure DevOps, Git, Docker, Postman, Visual Studio, VS Code, SSMS, Microsoft Teams
Testing:	xUnit, NUnit, Moq, Integration Testing, Unit Testing
Cloud & Services:	Azure (App Services, Blob Storage), AWS (SES, S3)

PROFILE

Full-stack .NET developer with 4+ years' experience building scalable web and mobile solutions for ecommerce and transport platforms. Proficient in C#, .NET Core, SQL, React, and Azure, with a strong grasp of clean architecture, CI/CD, and cloud deployments. Known for writing clean, testable code and collaborating effectively across design and development teams.
